

THE FUTURE IS NOW

The Next Generation of Floor Covering Adhesives

APAC
Building Bonds for Life

Over the years, the floor covering industry, the A & D community and customers alike have become more concerned about environmental issues than ever before. No doubt, “green” has become the performance of choice in our market. As an

Environmentally safe adhesives that exceed industry standards for “green”.

adhesive manufacturer in the heart of the carpet industry, Dalton, Georgia, APAC knows the importance of supporting our industry’s growth by manufacturing high performance V.O.C. compliant adhesives. Many of APAC adhesives already carry the Carpet and Rug Institute’s “Green Label Plus” seal of approval as well as meet the strict V.O.C. emissions standards set forth by the FCAMC (Floor Covering Adhesives Manufacturers Committee). Most of our adhesives for wood, carpet, resilient, and ceramic exceed the LEEDS and CHPS specifications making them the adhesives of choice by architects, interior designers and floor covering manufacturers.

At APAC, our outstanding success over the years has been the result of developing quality products at a competitive price that are safe for our

APAC stands for value and trust.

customers to use and safe for our employees to manufacture. We will continue to reduce emissions to the lowest levels working closely with our corporate partners as technology emerges.

We are a customer driven company that works for you. APAC is noted for its customer service and attention to detail. We are committed to controlled growth through full line and accessories products distribution.

APAC is dedicated to distribution.

Working closely with our suppliers and distributors, we want to be the brand of choice in the installation community. As a distributor focused company, we strive to be the most complete trouble free adhesive line in the market today.

APAC’s ECOlogical adhesives meets all industry standards regarding indoor air quality or product emissions. We have a full line of adhesives available in the ECOlogical line that carry CRI Green Label Plus, and meet LEEDS and CHPS specifications. The ECOlogical adhesives are recommended for use in hospitals, nursing homes, schools and government buildings that require solvent free products. For your next job, insist on the Green Team... APAC’s ECOlogical Series.

Solvent free
Extremely low odor
Water-based
Non-toxic
Nonflammable

ECOPROTEK® is APAC’s unique blend of antimicrobial preservatives that are incorporated in all APAC adhesives.

ECOPROTEK® protects APAC adhesives by inhibiting the growth of fungi, mold and mildew that cause offensive odors and stains during the life of the floor covering installation. This is many times referred to as “dry state” protection. ECOPROTEK® also provides “in pail” protection against deteriorating bacterium that cause spoilage and product loss during shipping, storage and handling. This is many times referred to as “wet state” protection. Protect your investment and your environment by using APAC adhesives with ECOPROTEK®.

January 2004 All Purpose Adhesive Company started a new successful technical training program... **ATTAC – Academy of Technical Training and Adhesive Certification.** This

ATTAC – Academy of Technical Training and Adhesive Certification.

program has been developed to help our customers to better

understand our adhesive products and, sometimes more importantly, to understand each product’s applications. Emphasis is to be pro-active. The ATTAC is open to all APAC customers and their suppliers and partners. APAC has trained over 100 customers on the proper uses of its product line.

APAC’S ATTAC PROGRAM

The APAC “ATTAC PROGRAM” is APAC’s technical training and certification program for the company’s adhesive products. Its purpose is to educate and train distributors regarding:

1. New APAC products
2. The technical / applicational situations for which they were designed
3. The technical / applicational procedures to follow when using the products
4. The sales methods that can be used to promote these products to their end users
